Where the Future Pilots Are Made

W E L C O M E T O

Inversion Flight Academy

A decade of experience. A commitment to excellence.

With 10 years of experience in aviation and pilot training, Inversion Flight Academy is dedicated to developing confident, skilled, and professional aviators.

"It is not simply about learning how to steer an aircraft; it is about cultivating an unshakeable mindset of airmanship."

Becoming a pilot is more than learning to fly. It requires discipline, precision, sound judgement, and the right mindset. Our structured training and experienced mentorship are designed to prepare you for every stage of your journey — from your first flight to the professional cockpit.

10 YEARS. ONE PASSION.

A LIFETIME IN THE SKIES.

Your journey to becoming a professional pilot starts here.

A woman with long dark hair, wearing sunglasses and a white pilot's uniform with epaulettes, stands in front of a blurred airplane. The background is a clear blue sky.

“ The sky isn’t the
limit.

It’s the foundation.

Located perfectly in Heidelberg, Inversion Flight Academy delivers world-class flight training that honors the profound heritage of aviation while pioneering its incredibly diverse future.

We train aviators to possess flawless precision, unshakeable confidence, and an intuitive mastery of the elements. From your first solo flight to commander of a commercial deck, your journey to excellence happens exactly here in our pristine facility.

OUR ADVANTAGE

Beyond Standard Instruction.

I **Unbreakable Safety**

Risk management isn't an afterthought; it is integrated profoundly into every single maneuver and calculated decision you make.

II **Expert Instructors**

Your mentors embody decades of high-caliber commercial and technical general aviation expertise, yielding unparalleled guidance.

III **Tailored Mentorship**

We heavily limit batch sizing to ensure every student actually receives the one-on-one attention necessary to forge immense skill.

THE CURRICULUM

Commercial Pilot (CPL)

Our Commercial Pilot Licence (CPL) Program at Inversion is a structured, phase-based flight training programme designed to meet the requirements of the Indian DGCA. The programme takes students from their initial flight training through to CPL completion, with a clear progression of ground school, flight training, examinations, and practical assessments.

The programme comprises a total of 213 flight training hours, including 15 hours of Multi-Engine training and 40 hours of Instrument Flight (IF) training. The training is delivered through 4 structured phases, allowing students to progressively develop their knowledge, skills, and flight experience while following a clear pathway towards becoming a professional commercial pilot.

At Inversion, we follow a structured training approach with planned milestones, continuous progress monitoring, and dedicated support throughout the programme. The successful completion of the programme requires the full cooperation, commitment, discipline, and active participation of every student. Students are expected to follow the training schedule, attend required briefings and examinations, maintain regular communication with the training team, and complete all assigned requirements within the stipulated timelines. Close cooperation between the student, instructors, and training team is essential to maintaining progress and achieving the required standards efficiently.

TOTAL ESTIMATED PROGRAM COST

The total estimated programme cost is R876,300, inclusive of 213 hours of flight training, accommodation, utilities, scheduled transportation, and amenities for a period of 15 months.

The estimated cost is based on the scheduled training programme and the services included for the stated period. Any additional training required beyond the scheduled hours, or any services extending beyond the included period, may incur additional charges. Prices are subject to change based on applicable operational and training costs.

Private Pilot *Licence.*

Build your foundation through ground training, flight training, solo flying, navigation, and practical instruction, progressing from SPL to PPL.

ITEMS	QTY	PRICE	TOTAL

T E R M S A N D C O N D I T I O N S

- 1. Estimated Cost:** The estimated quote is R 876,300 (VAT inclusive), covering 213 flight hours, accommodation, utilities, scheduled transport, and amenities for up to 15 months. Additional hours or services not included will be charged separately.
- 2. Payment & Refunds:** Payments must follow the agreed schedule. Training or services already provided are non-refundable. Any applicable refund is subject to the Academy's refund policy and applicable deductions.
- 3. Additional Costs:** Additional flight hours, airport charges outside Heidelberg, repeat examinations/licensing, regulatory or third-party fees, visa, travel, banking charges, equipment, extended accommodation, damages, fines, and student-requested services are payable separately. Academy uniform is mandatory and must be purchased from the Academy store.
- 4. Training Operations:** Training is subject to weather, aircraft serviceability, maintenance, snags, instructor availability, airport restrictions, safety, and regulations. Delays, cancellations, or rescheduling may occur and completion dates cannot be guaranteed.
- 5. Price Changes:** The estimate may change due to fuel, operational costs, regulatory or third-party fee changes, exchange rates, or market conditions. Any cost not specifically stated as included will be charged separately.
- 6. Any additional items, such as uniforms, logbooks, books, and other training materials, can be purchased from our academy store at an additional cost.**

*These are the IF (Instrument Flight) training flights, along with the total hours that can be logged for each session.

"The horizon is waiting.
